

# The Freeman Food Warmer Goes Anywhere.

Model  
FFW100

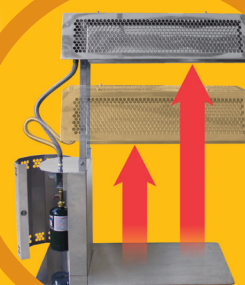

Model  
FFW200

Heats From the Top...  
Where Food Is Served!

A Carving, Chafing, or  
Warming Station

Adjustable Height and  
Temperature

Uses Gas!  
No Power Cords!

Patent No. 6575154

The **Freeman "SafeServ" Cordless Food Warmer** is a dream machine come true. You're up and going in no time... anywhere. There's no hunting for electrical outlets, taping down power cords, or service overloads. This rugged unit uses *gas* for *instant* heating. With adjustable height and temperature settings, warming, carving, or holding entrees is *safer* and *tastier* than with electrical units. Heating from above helps keep food at safer temperatures longer and preserves a crisp, not rubbery taste. With several finishes available – mirror, brushed, black wrinkle, or silver-vein – your service will be fitting at the most elegant indoor or the most remote outdoor event. **Self-contained. Versatile. Impressive.**
